

23 October 2025

To our valued customers,

Further to our August communications regarding price changes to refrigerants, we have now moved refrigerants into a monthly commodity review cycle.

This communication confirms that there will be pricing changes applicable to select Refrigerants, Copper and Paircoil on 1 November 2025.

Whilst this will occur, firm quotations on refrigerants will remain valid for 30 days and our branch teams can support you with providing and conversion of valid quotations.

We understand that these refrigerant price changes are having a significant impact and we continue to encourage the use of alternatives to R404A and R507.

All new refrigeration systems should be designed using a lower GWP alternative where possible, please refer to <https://gas2go.com.au/products/> for more information.

We encourage you to review pricing via the Beijer Ref RefShop or contact your nearest branch or representative.

We appreciate your ongoing business and support.

Best regards,

The team at Beijer Ref Australia
