

CONDENSER MOUNT

The Freddox Condenser Mount range provides a robust and versatile mounting solution designed to suit a wide range of condensing units. Engineered to improve unit stability for ground-mounted installations, these mounts also increase unit height to help combat corrosion in areas where water pooling may be present.

Each mount is fitted with seven integrated anti-slip and vibration-absorbing strips, reducing noise transmission and enhancing overall system performance and longevity.

The Freddox Condenser Mount range delivers a reliable, durable, and installer-friendly solution for protecting equipment and improving installation quality.

Key Features

- Manufactured from UV-resistant PVC for outdoor durability
- Long-lasting colour stability to maintain a professional appearance
- 7 integrated anti-slip / vibration-absorbing strips per mount
- Supplied with 4 × M10 hot-dip galvanised nuts, bolts, and washers
- Optional end covers available for a clean, finished look
