Notice to Beijer Ref Customers

Global commodity markets continue to experience significant volatility, with copper and silver solder showing sustained upward trends.

To reflect these market conditions, Beijer Ref reviews commodity pricing (Copper, Paircoil, Solder, Refrigerant) on an ongoing basis, and adjustments may occur without prior notice.

Effective immediately, pricing for Copper, Paircoil, and Solder will be adjusted. In addition, products incorporating copper or brass components are expected to see increases in the coming months.

Quotation terms have also been updated. Given the current volatility, we encourage customers to use the Beijer Ref RefShop or contact their nearest branch or representative before placing orders. For project quotations, please reach out to us directly so we can help minimise any potential price shocks.

We greatly appreciate your continued business and support.

Best regards,

The team at Beijer Ref Australia
